

Xanadu Announces Technological Roadmap Presentation

August 24, 2026

TORONTO, Aug. 24, 2026 (GLOBE NEWSWIRE) -- Xanadu Quantum Technologies Limited ("Xanadu") (NASDAQ: XNDU) (TSX: XNDU), a leading photonic quantum computing company, today announced that the company will host a Technological Roadmap Presentation on August 31, 2026 at 1:00 p.m. ET. The live presentation and replay will be available via webcast [here](#) or on the company's website [here](#).

The event will provide investors and analysts with detailed insights into the company's technological roadmap and feature presentations from Xanadu's executive and technical leadership team addressing the company's path to large-scale fault tolerance.

About Xanadu

Founded in 2016, Xanadu is a Canadian photonic quantum computing company with the mission to build quantum computers that are useful and available to people everywhere. Xanadu is building fault-tolerant quantum computers using light, with systems designed to compute at room temperature. Xanadu develops both hardware and software, including [PennyLane](#), its open-source quantum computing platform. Xanadu is the first pure-play photonic quantum computing company to list on public markets (Nasdaq/TSX: XNDU) and is recognized globally for its breakthroughs in scalable quantum technologies.
